

To Whom It May Concern:

SANDU MARIA-TEODORA took part in our Java Programming course and was one of our better students.

The first module covered was 'Introduction to Programming in Java': environment setup and general concepts, variables, data types, operators, flow control and loops.

In the second module we covered more advanced topics like functions, data structures, collections and object-oriented programming.

The third module covered exceptions and exception handling, unit testing and preparing a final Java project.

MARIA-TEODORA is a quick learner and did not hesitate to expand her knowledge by embracing new technologies. MARIA-TEODORA possesses good analytical skills and overall, she is a professional, curious, and passionate software engineer.

In conclusion, we think MARIA-TEODORA can be a valuable employee in your company for a position as Junior Java Developer. We fully recommend her and wish her the very best for the future.

Sincerely,

Andy Sînpetrea
